

DESIGN GUIDE

Polybags

Essential information for designing your
custom polybags.

GARMENT BRANDING & PACKAGING

Polybag Styles

We produce 3 main styles of polybag.

Clear Polybags

Fully transparent polybags that allow the contents to be seen clearly.

Frosted Polybags

A semi-transparent appearance that can be on one side or both.
Popular with underwear and swimwear items.

Solid Colour Polybags

Typically used for mailing bags, solid colours can be bold and eye-catching to match your branding.

Print & Colours

Designs can be printed in spot colours matched to Pantones, or in 4-colour process (CMYK).

The number of print colours and complexity of design will affect the initial mould costs involved.

Design & Specifications

Our polybags are made bespoke to your requirements, but there are some key things to consider.

Thickness

The thickness for standard polybags is 60mu (0.06mm), while mailing bags generally use a thicker material of 100mu (0.1mm).

Other thicknesses are available for both polybags and mailing bags.

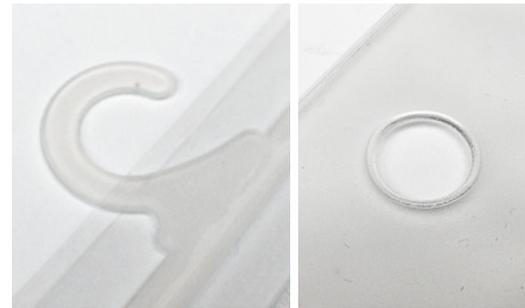

Size

Our polybags are custom made so you can specify the size required that best suits the contents.

Additional Considerations

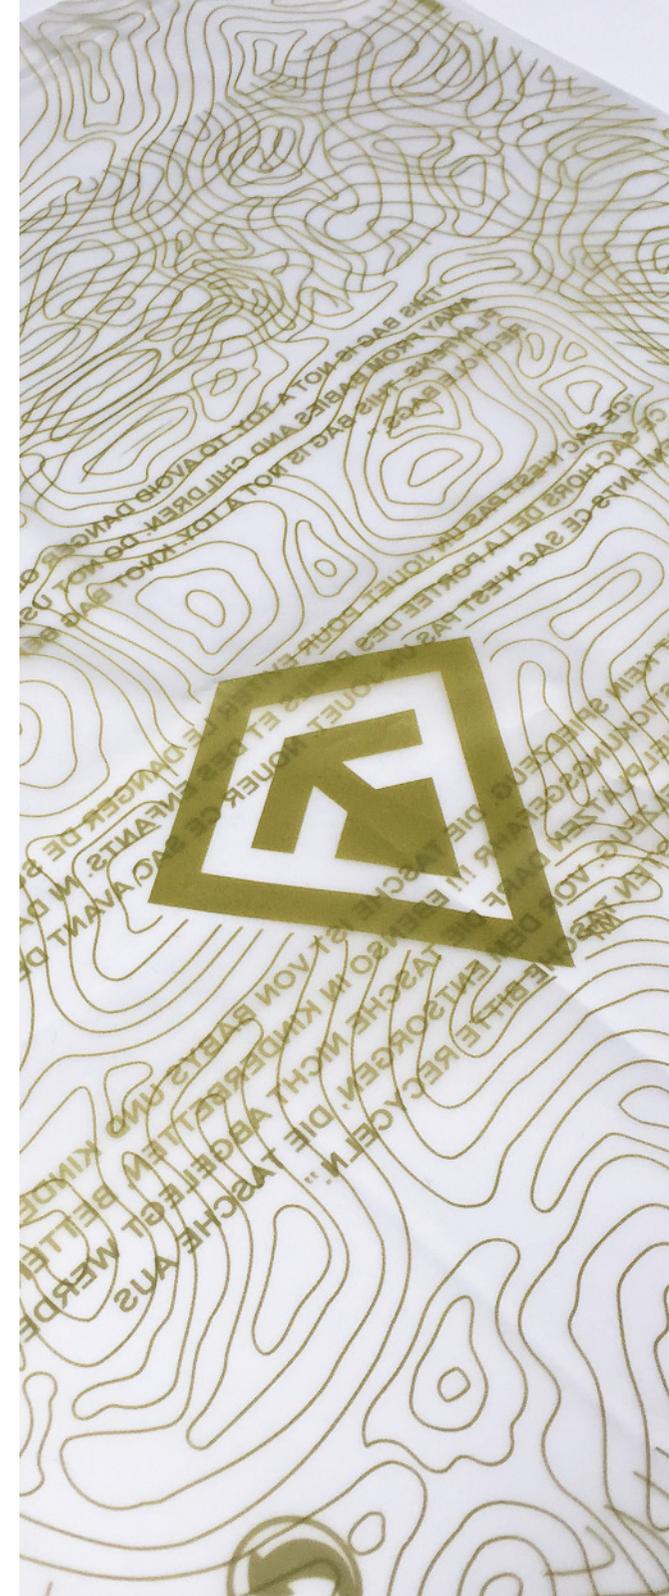

Hanging Hook/Hole

If your polybag will be used to display products in-store, we can add a hook or a punched hole for hanging on a rail.

Safety

You may wish to add safety warnings to your polybag regarding suffocation. We can also punch an air hole if required.

Closure Options

There are 4 main options regarding the closure of your polybags.

Zip Lock Closure

Grip Seal Closure

Adhesive Closure

Plastic Snap Closure

You now have all the tools to get designing your polybags, but if you still have any questions, do not hesitate to get in touch. We look forward to hearing from you and seeing your designs.
