* Available in real and imitation alternatives

Button Styles

Depending on your choice of material, there are a number of styles available.

4-Hole

2-Hole

Slot

Shank

Eyeleted Hole

Fish Eye

Logo, Colour & Size

As our buttons are custom made, there are a number of logo and design options available to you.

Logo Options

Face Engraved

Typically, designs are engraved on the top face of the button.

Side Engraved

An alternative option is to have a logo engraved on the side edge of the button.

Colour

Plastic buttons are usually matched to Pantones or colour swatches. Horn, corozo, wood and shell are natural materials so colours can vary. For imitation versions we are able to offer various shades and tones that are uniform for production.

We have a range of metalware finishes from basic colours such as antique brass, to more specialist polished finishes. You may also wish to consider having an enamel finish or a rubber coated finish which are matched to Pantones.

Size

The size of your button will depend on what type of garment you plan to use the button on.

A basic shirt button would be 9-12 mm diameter, whereas for a jacket, something larger would be more suitable.

We can make the buttons to your specified size, so let us know your preference.

You now have all the tools to get designing your sew-on buttons, but if you still have any questions, do not hesitate to get in touch. We look forward to hearing from you and seeing your designs.
